

**Ex.No:10****VISUALIZE DATA USING ANY PLOTTING FRAMEWORK****AIM:**

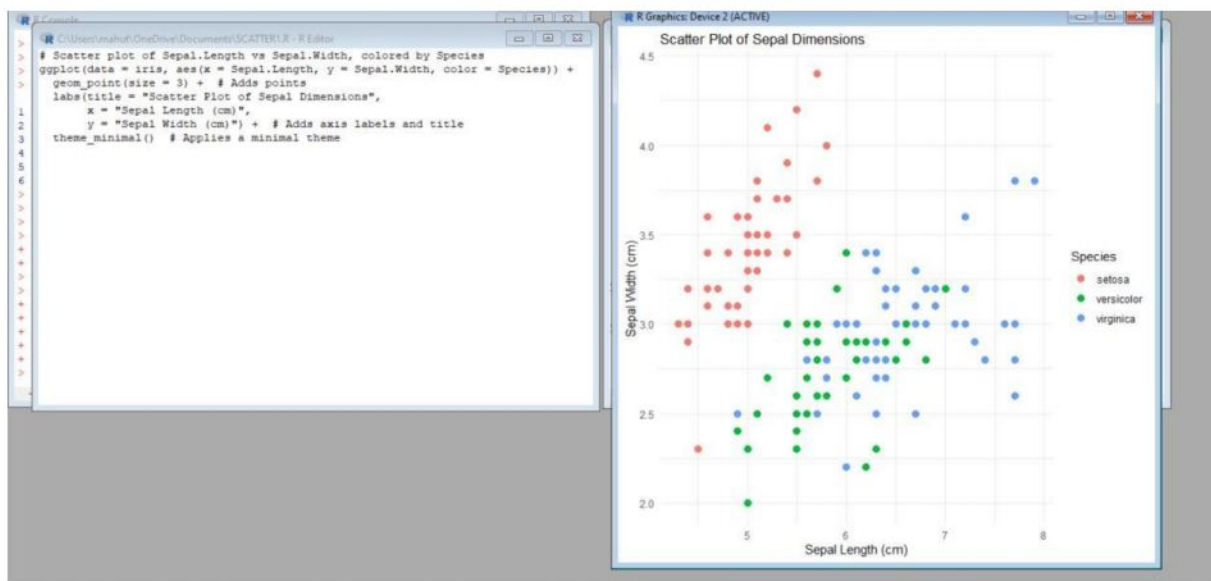

To visualize data using any plotting framework using R language .

**1) SCATTER PLOT**

```
# Install ggplot2 (if not already installed)
install.packages("ggplot2")

# Load the ggplot2 package
library(ggplot2)

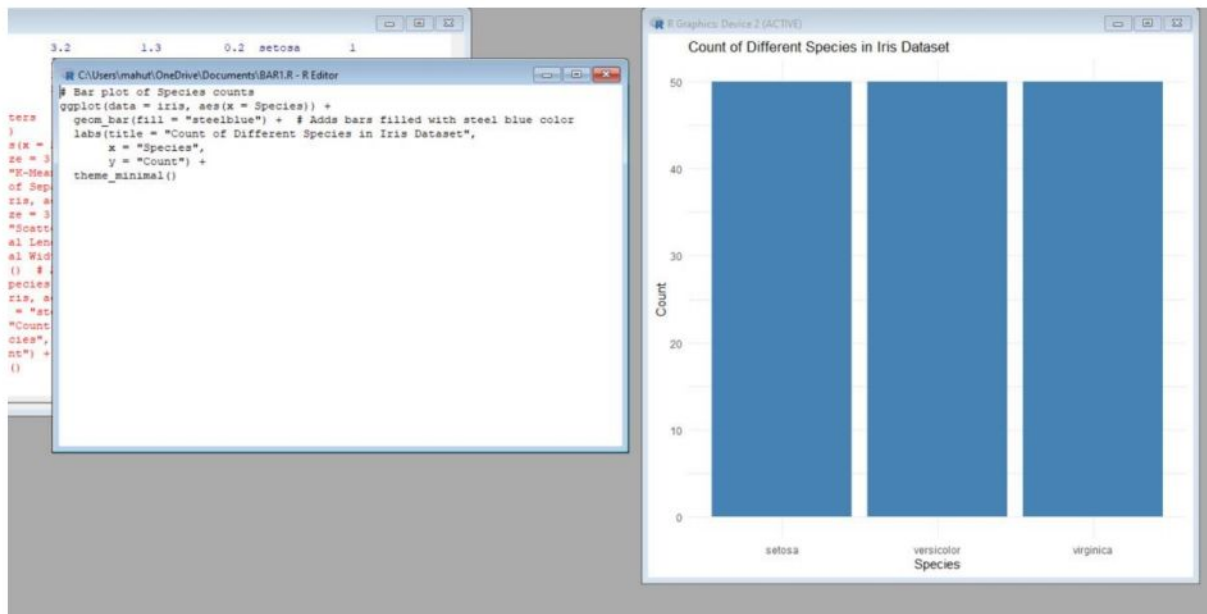

# Scatter plot of Sepal.Length vs Sepal.Width, colored by Species
ggplot(data = iris, aes(x = Sepal.Length, y = Sepal.Width, color = Species))
+ geom_point(size = 3) + # Adds points labs(title = "Scatter Plot of Sepal
Dimensions", x = "Sepal Length (cm)", y = "Sepal Width (cm)") +
# Adds axis labels and title theme_minimal() # Applies a minimal theme
```

**2) BAR CHART**

```
# Install ggplot2 (if not already installed)
install.packages("ggplot2")

# Load the ggplot2 package
library(ggplot2)
```

```
# Bar plot of Species counts ggplot(data
= iris, aes(x = Species)) +
  geom_bar(fill = "steelblue") + # Adds bars filled with steel blue color
  labs(title = "Count of Different Species in Iris
Dataset", x = "Species", y = "Count") +
  theme_minimal()
```

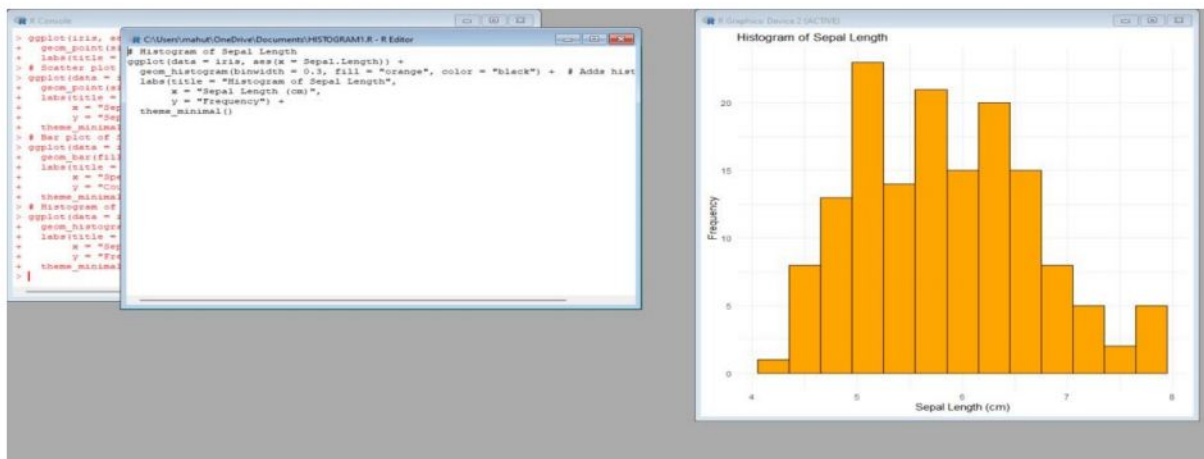

### 3) HISTOGRAM

```
# Install ggplot2 (if not already installed)
install.packages("ggplot2")

# Load the ggplot2 package
library(ggplot2)

# Histogram of Sepal Length
ggplot(data = iris, aes(x = Sepal.Length)) +
  geom_histogram(binwidth = 0.3, fill = "orange", color = "black") + # Adds
  histogram bars
  labs(title = "Histogram of Sepal
Length", x = "Sepal Length (cm)",
y = "Frequency") +
  theme_minimal()
```

#### 4)BOX PLOT

# Install ggplot2 (if not already installed)

install.packages("ggplot2")

# Load the ggplot2 package

library(ggplot2)

# Box plot of Sepal Length for each Species

ggplot(data = iris, aes(x = Species, y = Sepal.Length, fill = Species))

+ geom\_boxplot() + # Adds box plot labs(title = "Box Plot of Sepal Length by Species", x = "Species", y = "Sepal Length (cm)") + theme\_minimal()

RESULT :

Thus to visualize data using plotting framework using R language is successfully completed.
